ULTRA-LOW NVH

Improvements in Noise, Vibration and Harshness translate into a noticeably smoother and more refined on-road driving experience.

VEHICLE DYNAMIC CONTROL (VDC)

Seven Sensors in the Navara monitor driver inputs and vehicle motion, gently aiding the vehicle's ability to stay on the driver's intended path. Vehicle Dynamic Control helps control and limit both understeer and oversteer, maintains optimum traction and even applies brake pressure to reduce wheel slip on loose road surfaces.

ELECTRONIC BRAKE FORCE DISTRIBUTION (EBD) WITH BRAKING ASSIST (BA)

Reduce stopping distances in emergencies by up to 15% with Braking Assist. The Navara detects panic braking and automatically increases pedal pressure for confident, controlled braking to avoid collisions at high speed.

TRAILER STABILITY ASSIST (TSA)

New to the Nissan Range and standard across all models, TSA inspires towing confidence by detecting any instability, sway or "fishtailing" in the trailer while driving and quickly brings the trailer back into a safe axis.

ROCK SOLID OFF-ROAD CAPABILITY

ANY TERRAIN. ANY TIME.

Take on the most challenging environments that Africa has to offer with ultimate confidence. The latest in electronic driver technology meets decades of hardworking Nissan pickup heritage to create the toughest Navara ever, purpose built to conquer and built to last. The all-new Navara merges capability and sophistication for you to cruise rolling dunes, tackle river crossings with ease or navigate an extreme rocky trail with rock solid confidence.

ON THE FLY 4X4

Easily shift from 2WD to 4H thanks to the Navara's On The Fly 4X4 system. Whether it's 4WD High you need for a bit of light off-roading, or 4WD Low for navigating obstacles, deep sand, snow, or mud it's an easy switch. For every day driving, 2WD mode helps keep your trip more fuel-efficient.

HILL DESCENT CONTROL (HDC)

Hill Descent Control makes going down steep gradients manageable by automatically adjusting your speed and brake pressure to help keep you safely in control, at a constant speed.

HILL START ASSIST (HSA)

It's never an uphill battle with Hill Start Assist to prevent from rolling backwards on steep inclines.

BRAKE LIMITED SLIP DIFFERENTIAL (B-LSD)

Whenever it senses a wheel beginning to slip, the all-new Navara's Brake Limited Slip Differential system automatically brakes the slipping wheel and sends additional power to the wheels with the most traction, giving you better performance.
